

SMART®

Clearer lessons, naturally amplified.

SMART SoundLift

Wearable voice amplification

Skip the setup. Just speak.

Introducing **SMART SoundLift**, the wearable voice amplification solution. Traditional classroom audio is often a choice between expensive, cable-heavy, permanent hardware installations or feedback-prone portable mics. SoundLift eliminates the 'shouting match' against classroom noise by ensuring that multimedia audio never competes with your instructions.

Audio for everyone

Help multilingual, hard-of-hearing, and remote learners absorb and process lessons faster and more easily.

- ✓ Simultaneous pass-through
- ✓ Feedback suppression
- ✓ Improve AI transcription

Out of the box brilliance

Built to handle the demands of a full school day, SoundLift has everything you need to connect out of the box.

- ✓ Includes 2x microphones
- ✓ 12 hours battery life*
- ✓ 98 ft/30 m wireless range

Engineered for ease

Compatible with retrofit iQ4 displays like the **SMART Board MX**, SoundLift maximizes your investment.

- ✓ Reduce vocal strain
- ✓ Enhance clarity
- ✓ Pair with SMART displays

*includes battery life provided by the charging case

Talk all day, without the strain.

Our crystal-clear audio transmission means you can speak at a natural, conversational volume whilst your lesson soars directly through your SMART Board. With 12 hours of total battery life, it pairs with AI tools to allow for more accurate translation and transcription, all whilst saving your voice.
